Ed,

Alice and CPF are not going to respond but it's really important for SFPUC staff to come up with answers about whether the stuff does or does not contain the chemicals that Stauber, et al, say it does, and if so,

RE: FW: Letter to Alice Waters from the OCA

in what doses and what those dose levels mean. It's not enough, at least in San Francisco, to say it's better than fed and state regs require. Can you get these answers quickly--as now that people are trying to oust me from the PUC--so I can decide whether to go on the offensive against these guys.

Thanks,

Francesca
